

22nd International Conference on
Diffusion in Solids and Liquids
22 TO 26 JUNE 2026 | RHODES, GREECE

SHORT BIO:

Krzysztof Lis is a specialist in Raman spectroscopy and scanning electron microscopy at the Faculty of Chemistry, Wrocław University of Science and Technology (Poland), where he focuses on advanced structural and morphological analysis of inorganic and hybrid materials. He also works at KGHM CUPRUM sp. z o.o. Research and Development Centre, where he leads work in an industrial synthesis laboratory, designing processes and equipment aimed at improving mining operations and addressing environmental challenges within the mining sector.

He earned his PhD in chemistry at Wrocław University of Science and Technology, where his research centered on the synthesis and study of functional materials, combining spectroscopic and microscopic methods to understand their structure–property relationships. His current work integrates synthesis, vibrational spectroscopy, and electron microscopy to support both fundamental research and industry-oriented innovation.
